TO WHOM IT MAY CONCERN

Hereby the Mini-Grid Support Programme (MGSP) of Alternative Energy Promotion Centre/ Energy Sector Assistance Programme (AEPC/ESAP), likes to show its support to The Nepal Trust's initiative to implement a Renewable Energy Service Centre in Humla District, Nepal.

This much needed environment friendly initiative will be of great support to local communities living in the remoter parts of Nepal, where accessibility to clean energy resources is extremely difficult and costly.

This project will not only facilitate in the sustainability of existing Governmental supported and private sector renewable energy power schemes, but also those to be implemented in future.

MGSP recognizes the great potential of this project and is therefore happy to provide technical advice to support the project where possible.

Yours sincerely,

Devendra Prasad Adhikari
