

The Facts:

1. Girls living in poverty lack menstrual supplies to manage their periods. Imagine if you come from a house of 5 women each living on less than \$1/day - affording menstrual products is out of the question.
2. Poor teenage girls are missing 2-5 days of school per month - staying home while they have their period. This can add up to 20% of their education in their adolescent years!
3. Studies show that every year of schooling increasing a girl's future earning power by 10 to 20 percent.
4. Less than half a cent of every development dollar goes to programs specifically for girls, particularly those ages 10-14.
5. Girls make up 70 percent of the world's 125 million out-of-school youth.
6. The positive impact of girls' education has been shown to transcend generations, resulting in better health outcomes among women, their children, and eventually their grandchildren. When a woman has an income, she will invest 90% back into her family and her children's health and education compared to 30% for men.
7. An adolescent girl is the world's most powerful force for change and the most influential figure in today's society.

LunaPads gives girls living in extreme poverty immediate, essential and sustainable means to remain in school or at work while menstruating. For just \$20 you can provide one adolescent girl with a shot at up to 20% more education. LunaPads kits are environmentally friendly, safe, healthy, easy to use and last for up to 5 years! More education for our girls means healthier families, stronger communities and a better world. Invest in a girl and she will do the rest.
